DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-2, 4, 7-8 and 15, drawn to a method of enhancing memory, classified in class 514, subclass 2.
 - II. Claims 3, 7-8, and 15, drawn to a method of enhancing synaptic transmission, classified in class 514, subclass 2.
 - III. Claims 5, 7-8, and 15, drawn to a method of treating brain injury, classified in class 514, subclass 2.
 - IV. Claims 6-8, and 15, drawn to a method of treating spinal cord injury, classified in class 514, subclass 2.
 - V. Claims 9-10, drawn to a pharmaceutical composition, classified in class 514, subclass 2.
 - VI. Claims 11-12 and 15, drawn to a method of causing amnesia, classification could not be determined because the structure of inhibitor was not provided.
 - VII. Claims 11, 13 and 15, drawn to a method of using pseudosubstrate inhibitor, classified in class 514, subclass 2.
 - VIII. Claim 14, drawn to a method of causing amnesia with alterned form, classified in class 514, subclass 2.
 - IX. Claim 14, drawn to a method of causing amnesia with antisense, classified in class 514, subclass 44.

The inventions are distinct, each from the other because of the following reasons:

The methods of inventions I-IV and VI-IX are distinct, each from the other, because they are drawn to processes having materially different process steps, which are practiced for materially different purposes.

The products of invention V, and the processes invention I-IV and VII-VIII are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the products of group V can be used in any one of the alternative processes of I-IV or VII-VIII.

The products of invention V is not used by or produced by the methods of Group VI and IX.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, separate search requirements, and different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Attorney Peter Bernstein on 17 June 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
